Alarm clock

CREATE A NOTIFICATION AND KEEP TRACK OF MARKET DYNAMICS!

Do you want to keep abreast of the latest changes in the market? The easiest way to do so is to create a notification in the Trader's Alarm Clock app! Choose the necessary trading instrument, the deal type and set the target level. As soon as this level is reached, you will immediately get a push notification.

React Native.

Converter and wallet

currency converter and virtual wallet app enables you to track changes in currency quotes, easily convert any amount at up-to-date rates and helps you to keep records of your transactions. You can add most of the popular currencies in your wallet and track their dynamic. At the same time, you will get real-time cryptocurrency exchange rates

React Native.
